PRODUCT CATALOGUE

About us

Incorporated in 1990, Method Enterprise initially operated as a trading entity primarily focusing on supplying laboratory service fittings and emergency shower. Back then, most of these products were imported from Europe.

Realizing the vast potential to manufacture these products locally, Method Enterprise in 1994, pioneered the manufacturing of 'Laboratory Service Fittings' in Malaysia. With the strong support of customers and other stakeholders, Method Enterprise achieved swift success. Subsequently, Method expanded into the manufacturing of other laboratory related products, namely Emergency Drench Shower, Emergency Eye-Washes and Chemical Waste Discharge System.

To date, Method is one of the largest manufacturer of Laboratory Fittings & Emergency Shower and Eyewash in the ASEAN region.
